Questions to interview panel

Based on the epic, here are three core questions you could ask the interview panel for the Lead Technical Architect role at Companies House:

1. **"Given the high volume of 14 million search requests per day and the diverse user base, how does the organisation balance performance, scalability, and security while adopting the latest cloud technologies and microservice architectures?"**
   (This question highlights your interest in understanding the organisation's approach to handling technical challenges at scale.)

2. **"What are the key business priorities that the architecture team is currently focusing on, and how does the Lead Technical Architect role contribute to shaping and aligning technical solutions with those objectives?"**
   (This demonstrates your interest in aligning technical leadership with business outcomes and understanding the impact of your role.)

3. **"Team collaboration and challenging established ways of working are emphasised in this role. Can you provide an example of how the architecture team has successfully implemented a new approach or design that delivered significant value to the organisation?"**
   (This shows you value collaborative innovation and are eager to learn how the team fosters creativity and change.)
